PROJECTS

02/2025 – 04/2025

CyberResilience Lab-Cyber Behavioral Risk Assessment & Psychological Defence System

This project helps users identify and resist modern cyber threats through awareness, simulation, and behavioral analysis. It not only improves cybersecurity knowledge but also strengthens psychological resistance against manipulation techniques used by cybercriminals. Thus, the system contributes towards building safer, smarter, and more cyber-resilient digital users.

04/2024 – 06/2024

Intrusion Detection and Prevention in Web Servers

The main aim of this project is to prevent the vulnerable virtual machines from being compromised in the cloud server using multi-phase distributed vulnerability detection, measurement, and countermeasure selection mechanism called NICE.
